

September 1, 2009

To Whom It May Concern:

Ravi Adhi, worked at Westfield Group from May 2009 to September 2009, representing Deloitte.

The project entailed migrating the JD Edwards Enterprise One, Job Cost & Sub-Contract modules from XE to 8.11, assessing and conducting a proof of concept to upgrade from 8.11 to version 9.0 and developing interfaces between the Proliance (construction system) and Enterprise One 8.11.

Ravi was the primary consultant for the implementation of the Sub Contract module and to assess the upgrade of the Property Management module from 8.11 to version 9.0. He also helped and participated in the other aspects of the project indicated above.

Ravi is very hard working and during the period under our employ, Ravi worked well with the project team and the client personnel to understand the key requirements of the Sub Contract module and translate them to the JDE system. Based on his knowledge of JDE, he made several recommendations that helped in improving the process.

Yours truly,

Manas Tripathy
Senior Manager
Deloitte
