

FLINT ENERGY SERVICES LTD.

INTEGRATED. INTEGRAL

August 30, 2007

To Whom It May Concern:

Ravi Adhi, representing Mid-Range, worked at Flint Energy Services Ltd. as a JD Edwards Testing Team Lead from May to September 2007.

The project involved migrating JD Edwards OneWorld 8.11 from an Intel to an iSeries platform. Ravi had the responsibility of coordinating a 15 person cross-functional team to create comprehensive process scripts and test the software on the new platform.

Flint Energy Services Ltd., including my Production Services division, successfully migrated to the new platform on August 26th, 2007 with no disruption to the business. Ravi's initiative to establish process flows and connect them to test scripts provided a valuable visual guide to help ensure that all issues were addressed prior to going live.

I am positive that the process flows, scripts and methodology that the Mid-Range team provided will be useful in future upgrades as well. I would not hesitate to recommend Ravi as a team lead to other companies considering the implementation of JD Edwards or process re-engineering within their organization.
